How Global Leaders Scale

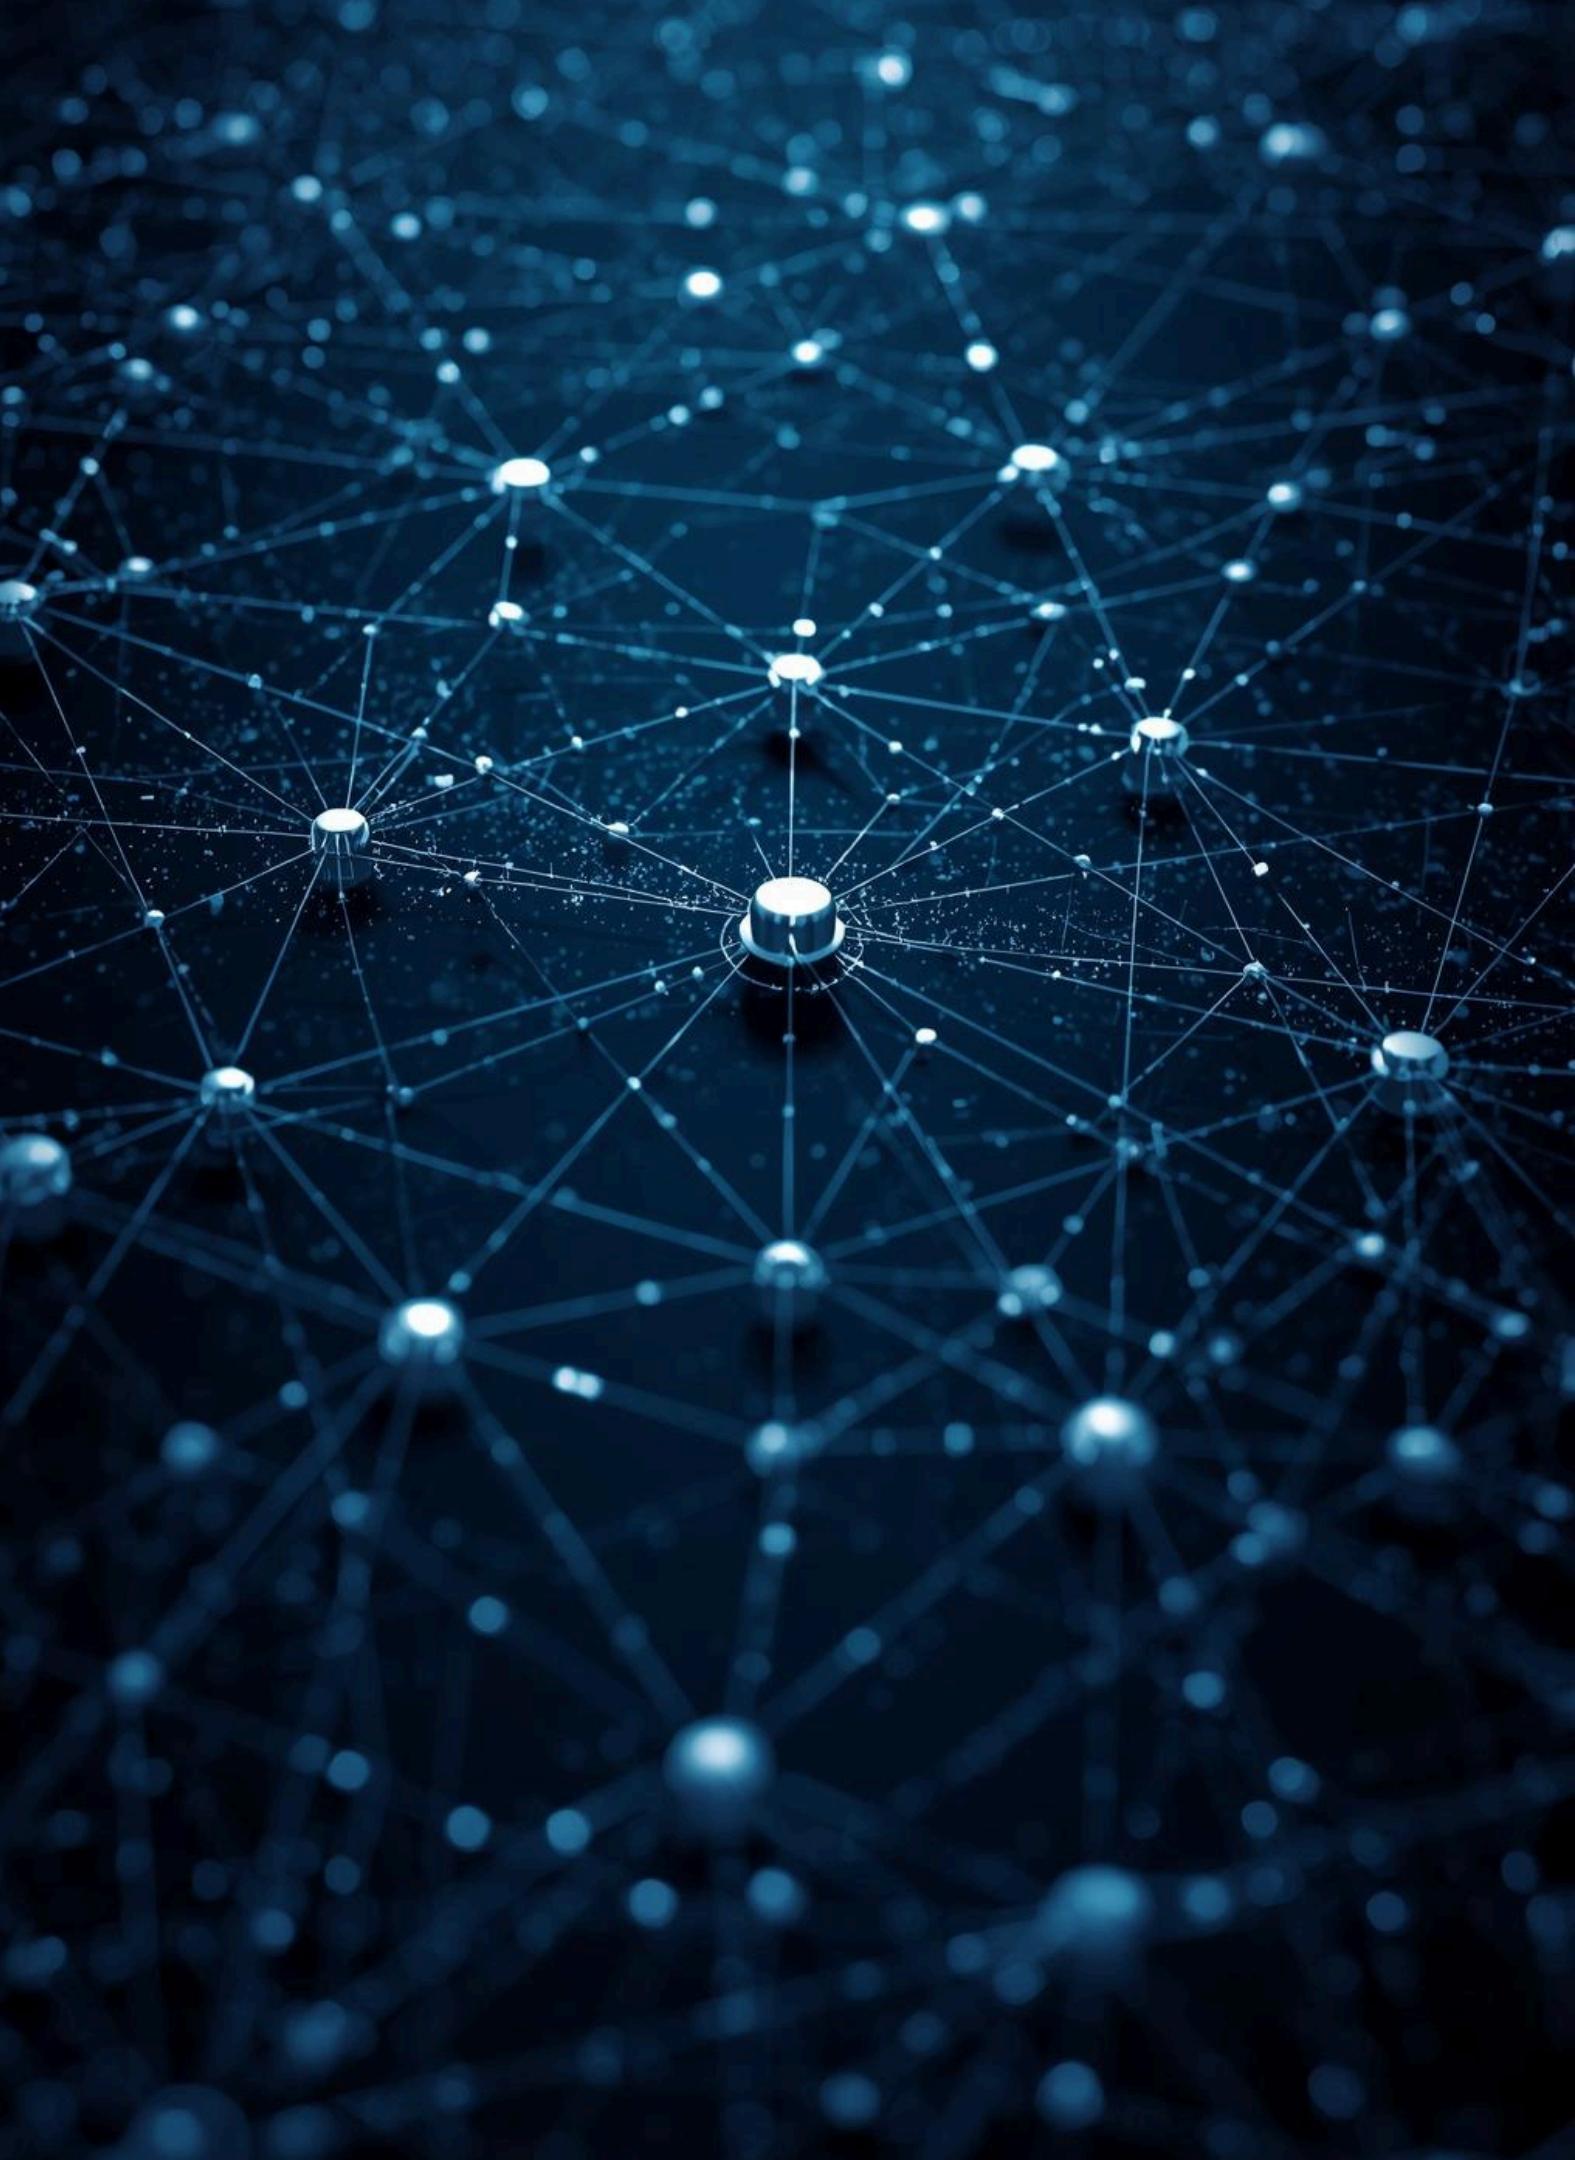

BNP Paribas Challenge

Automating document processing for **190,000 employees** was essential for BNP Paribas, yet they faced significant hurdles due to privacy concerns and the restriction against using public APIs.

BNP Paribas Solution

BNP Paribas addressed their automation needs by deploying Mistral models in a secure private 'LLM-as-a-Service' AI hub, ensuring data privacy and internal control for enhanced operational efficiency.

BNP Paribas Impact

The implementation of Mistral AI has resulted in **over 100 production use cases**, significantly reducing manual data entry and enhancing compliance control within BNP Paribas.

Stellantis Challenge

Stellantis faced the challenge of enabling **8,000+ engineers** to efficiently search complex blueprints while ensuring the protection of intellectual property rights and sensitive information.
